Competition Field Guide — Brief, Deliverables, Evaluation & Strategy

Field Guide

Edition №1

2026

The competition at a glance

AED 200,000 PRIZE POOL · 100K/65K/35K	15,000 m² AL SAFA 2 PARK, DUBAI	AED 35M IMPLEMENTATION BUDGET CAP
15 Aug 2026 SUBMISSION DEADLINE	16 REQUIRED DELIVERABLES	Free entry ONLINE ONLY · UAE PASS

The world's first AI-powered park design challenge, launched 28 June 2026 by Dubai Municipality. Open worldwide to professionals, students, researchers, startups and AI specialists, solo or in teams. AI is the **method, not the product**: it must demonstrably support research, site analysis, ideation, scenario testing, optimization and visualization — while every final decision stays human-led. Submission level: Concept + Preliminary Design (no construction documentation). Language: Arabic or English.

Caution: the official page shows a "submissions closed" banner despite the published 15 Aug 2026 deadline — verify in the portal before investing effort. Winners assign **all IP** to Dubai Municipality; every entrant grants a broad perpetual publication licence.

The 16 official deliverables

#	DELIVERABLE	CONTENTS / FORMAT
01	Executive Summary Presentation	Vision, concept, key innovations
02	Design Narrative & Concept Statement	Philosophy, vision, placemaking
03	Site Analysis & Opportunities	Context, constraints, environmental & climatic analysis
04	User & Community Analysis	User groups, personas, needs, human-centered considerations
05	AI Methodology Report	Tools, workflows, alternatives explored, AI's role in decisions
06	Concept & Preliminary Masterplan	Spatial organization, zoning, activity distribution
07	Landscape & Public Realm Plans	Landscape strategy, planting, open-space framework
08	Accessibility & Circulation Strategy	Universal access, pedestrian/bicycle circulation, service access
09	Sustainability & Resilience Strategy	Environmental, social, economic measures
10	Concept Diagrams & Design Drawings	Concept evolution, user journey, analytics — CAD/BIM
11	Sections & Elevations	Key sections/elevations — CAD/BIM
12	High-Quality Visualizations	Aerial, human-scale, key experiential views
13	Day & Night Perspectives	Same views, day and night activation
14	Full Project Presentation	Analysis → concept → masterplan → visuals

#	DELIVERABLE	CONTENTS / FORMAT
15	One-Minute Concept Animation	Vision, UX, key interventions; AI tools permitted — video
16	Additional Supporting Materials	Any extra drawings, models, animations

Plus: an indicative Commercial & Service Facilities Map, presentation boards, and team details (names, disciplines, roles, Emirates ID for residents, passport-size photos; one Team Leader).

Timeline & process

DATE	MILESTONE
28 Jun 2026	Launch; registration & submission portal opens
05 Aug 2026	Deadline for questions & clarifications (answers published throughout)
15 Aug 2026	Submission deadline
Then	Independent jury (architecture, urban design, landscape, AI + Dubai Government executives) shortlists → public vote helps select winners → first prize considered for real construction

Evaluation matrix — Schedule 7

Innovation & Creativity		20%
Human-Centered Design, Sustainability & Quality of Life		20%
Integration & Effective Use of AI		20%
Feasibility & Implementation Potential		20%
Quality of Design & User Experience		15%
Quality of Presentation & Communication		5%

Each criterion jury-scored 1–10 (1–2 poor · 3–4 fair · 5–6 good · 7–8 very good · 9–10 excellent). 80% of the score is substance, not renders.

Who won last year? Nobody — this is Edition №1

There are no past winners to study: this is the first edition of the world's first AI park design challenge. The best predictors of what wins are the evaluation weights, Dubai's Quality of Life Strategy 2033 (shaded, walkable, family-centric neighbourhoods), and the brief's insistence that AI augments — never replaces — human judgment.

Six suggested submission directions

01 «نبته» nabta wellness park — The Living Shade Loop — developed in this set.

Shade is the program: a 1 km continuously shaded figure-eight loop threading ten garden rooms. AI: solar/UTCI/wind simulation + generative shade-continuity optimization.

02 The Central Oasis.

A sunken crater garden using thermal mass, falaj-inspired evaporative cooling and dense palms. AI: CFD-driven landform sculpting for cold-air pooling.

03 Braided Wadis.

The park as a braided network of planted swales harvesting AC condensate, stormwater and TSE. AI: hydrological simulation and generative channel braiding.

04 The Productive Park.

Community orchard, date grove, teaching-kitchen kiosk, harvest majlis. AI: crop/water yield optimization + self-funding maintenance model — the strongest feasibility story.

05 The Night Garden.

Optimized for 6pm–midnight, Dubai's real outdoor hours: choreographed adaptive lighting, cool surfaces, moon garden, astronomy lawn. AI: footfall prediction + lighting-energy optimization.

06 The Learning Grove.

An open-air classroom about its own intelligence: visible sensors, a "how this park thinks" trail, school partnerships. AI: the park's transparent operations brain — and the exhibit itself.

Internal design review

Each package was independently scored against the six official criteria (weighted, /10; strict scale where 7 = very good), improved, and re-scored:

PKG	DELIVERABLE PACKAGE	BEFORE	AFTER
01	Executive Summary & Full Presentation Outline	6.5	7.9
02	Design Narrative & Concept Statement	6.0	7.8
03	Site Analysis & Opportunities Assessment	5.9	7.5
04	User & Community Analysis	5.9	7.5
05	Artificial Intelligence Methodology Report	6.7	7.9

PKG	DELIVERABLE PACKAGE	BEFORE	AFTER
06	Concept & Preliminary Masterplan	6.0	7.0
07	Landscape, Public Realm, Sustainability & Resilience	6.5	7.3
08	Accessibility, Circulation & Commercial Facilities	5.6	7.2
09	Concept Diagrams, Sections & Elevations	6.4	7.2
10	Visualizations, Day/Night, Animation & Extras	6.6	7.6
